-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Claims 18-28 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made without traverse in the reply filed on 10/20/2005.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over the combined teachings of Kawahara et al. and US patent #6,660,108 to Doko et al. (hereinafter "Doko '108").

Please see the comments made in regard to the above rejection in the previous Office actions (including the Final rejection of 5/8/2006 and the Advisory Action of 7/20/2006). No additional comments have been submitted with the filing of the RCE, and it is believed that all previous points of argument raised by the applicant have been properly addressed by the Examiner. As noted in the Advisory action, the difference between the lower limit of the value of Fe additive being claimed ("greater than 2.0%") and the upper limit of Kawahara et al.'s recommended range ("2.0%") is virtually nonexistent, being at the limit of measurable difference (one part per million?). Further, the single comparative example of Kawahara et al. that is labeled as being inferior for providing "breakage" during the rolling step (that falls within the claimed ranges, and thus "reads on" the claimed invention but for the "free of breakage" language) does not constitute a sufficient "teaching away" from the

claimed invention to overcome the *prima facie* case of *obviousness* for the reasons previously explained.

This is an RCE of applicant's earlier Application of the same serial number. All claims are drawn to the same invention claimed earlier in the application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered earlier in the application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is effectively a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Allen J. Flanigan whose telephone number is (571) 272-4910. The examiner can normally be reached on M-F 9:00-5:30.
